

ConSol ☀ Rough Cut Editor (RCE)

ConSol* Rough Cut Editor (RCE) helps to speed up your rough cut workflows and to make your craft edit places as efficient as possible. The software extends the Apple Final Cut Server with features for a web based rough cut: The editor receives the material from Final Cut Server and views it directly in his web browser. He can compile a rough version of his video per mouse click and export it directly to Final Cut Pro for fine cut.

-- System requirements --

Server:

- Apple Xserve (Intel)
- OSX Server 10.5.8 or 10.6.1
- Final Cut Server 1.5
- Proxy devices as well as all devices with high-resolution material must be configured as “edit-in-place” devices in Final Cut Server.

Client:

- Mac OS X 10.5.8 or 10.6.1
- Windows XP or Windows Vista

-- More services --

ConSol* would be happy to provide you with comprehensive consulting and operation services, e.g. **Apple remote and on-site services** or **Mac system monitoring services**. Optionally, we can also design and install your complete infrastructure (Xsan, Apple Server, Final Cut Server etc.).
