

ConSol CM

Your business processes at the forefront

ConSol CM: One platform for endless opportunities

- ConSol CM is a low-code platform for custom implementation of your processes and requirements in software – without developer knowledge
- With ConSol CM you - not your software - control your processes.
- 200 companies worldwide use ConSol CM. 20.000+ users are serving 2 million customers in a wide range of processes, such as CRM, customer service, IT service management, personnel management and many more.
- Parallel operation of multiple processes on one instance creates large-scale synergy.

The software from ConSol makes it possible to see the big picture thanks to its scalability and flexibility, while also allowing a manageable start where you can cover subsequent requirements step by step.

Head of Business Development
KYOCERA Document Solutions Deutschland GmbH

A look into the real-world application of ConSol CM

- Based on a low-code platform using BPM, CRM and case management, ConSol CM offers solution options for a wide variety of processes.
- Multiple business processes from completely different fields can be run in parallel on a single platform.
- The “silo mentality” is a thing of the past. ConSol CM facilitates solution-oriented and inter-department collaboration.
