MISSION & VISION

ConSol Consulting & Solutions Software GmbH, headquartered in Munich, has been accompanying local and international companies through the entire software lifecycle with custom-fit IT solutions for more than 40 years. High-end IT consulting, agile software development, and operation and support services are the cornerstones of their constantly expanding technological state-of-the-art portfolio. These include open source projects such as Quarkus, OpenShift, or Tekton. The company also develops and sells ConSol CM software, a platform for digitizing business processes.

In implementing its customers' digitization strategies, **ConSol makes IT environments and business processes fit for the challenges of tomorrow**. With the guiding principles of providing the highest quality and excellence, ConSol follows the goal of advancing businesses. ConSol focuses on areas such as cloud-native, containers, microservice architectures, and IT automation.

COMPETENCES & SERVICES

Software Engineering - for Your Digital Future

Whether modern software architecture, future-proof IT integration or a tailor-made CI/CD pipeline – we can help you master the challenges of digitization.

IT Consulting - your Partner at Eye Level

We bring a breath of fresh air into your processes & digital strategies. Agile, competent and with individually tailored consulting services, we support you e.g. in open source monitoring or cloud issues.

IT operations - Made to Measure

Whether managed services, IT operations or support – at ConSol you choose exactly the services you need to keep your IT running efficiently. Individual SLAs provide calculation security – on-prem or in the cloud.

IT Solutions - from Practice for Practice

We are a place where the spirit of research meets technological challenges. This promotes innovations that result in IT solutions with high user value. For example our software ConSol CM, our open source offer for test automation or Red Hat Solutions.

Process Management Software ConSol CM

Whether individual or standardized: With ConSol CM you can easily record, control and quickly resolve inquiries from customers, employees and partners.
